ONLINE ABACUS CLASSES

Package B
Advanced Plan

A scalable, enterprise-grade digital platform for your Abacus coaching brand

CLIENT FEATURE OVERVIEW

Built for India + US & UAE NRI markets • CMS-style • SEO-first • Highly configurable

1. Executive Summary

This is a complete, enterprise-grade digital platform—not just a website, but a full business operating system for your Abacus coaching brand. It combines a full-featured LMS with a configurable, multi-level permission system on one unified platform.

The platform is designed to grow with the business: pages, SEO strategies, staff roles and future features can be expanded without rebuilding the system or depending on a developer for every small change.

CMS-STYLE	MASTER-DRIVEN	SEO-FIRST	SUPER ADMIN
Add pages, edit content & manage site settings	Batches, teachers, courses & pricing stay dynamic	Responsive and built for strong search visibility	Centralized, granular role & permission control

2. What We Are Building

A fully responsive, SEO-optimized web application for delivering online Abacus classes to Indian students and NRI students in the US and UAE. The platform works like a CMS, allowing most pages, settings, SEO controls and future features to be managed from the admin side.

- CMS-style architecture — add pages, edit content and manage the site.
- Master-driven data — batches, teachers, courses and pricing are managed through master records.
- 100% SEO Friendly & Fully Responsive — mobile, tablet and desktop ready.
- Super Admin–governed architecture — centralized control over what every role can view, access, edit or delete.

3. Platform Panels — Complete Overview

Four connected user experiences plus the public website, all operating from one central database.

PANEL	WHO USES IT	PURPOSE
Super Admin Panel	Business Owner / Top Management	Full command center — roles, permissions & entire system
Admin Panel	Operations / Office Staff	Day-to-day management — batches, teachers, students, fees, content & SEO
Teacher Panel	Teachers	Manage classes, students & schedules
Student / Parent Panel	Students & Parents	Browse, enroll, pay, attend & track progress
Public Website	General Visitors	SEO-optimized marketing site driving discovery & registrations

4. Super Admin Panel — The Command Center

Foundation layer of the entire platform. Everything else operates within the boundaries set by the Super Admin.

Role & Permission Control

- Define unlimited Admin roles (e.g., Operations Admin, Finance Admin, Content Admin) with custom permission sets.
- Granular View / Edit / Add / Delete control down to pages, modules and specific fields.
- Control which Admin Panel pages/sections are visible to each role.
- Control which pages/features are accessible to Students.
- Create, edit, suspend or delete any Admin, Teacher or Student account.

System-Wide Oversight

- Master control over site settings, SEO configuration, plugin installations and payment gateway configuration.
- Full activity/audit log showing who changed what and when.
- Override or reverse actions taken by any Admin.
- Global announcements/notifications across Admin, Teacher and Student panels.

Business Intelligence

- Consolidated dashboard for revenue, active students, active batches, teacher performance and expenses.
- Exportable Excel/PDF reports for accounting and business review.

5. Admin Panel — Day-to-Day Operations

Daily business management within the permission boundaries defined by the Super Admin.

Site Identity & Branding

- Site title, tagline, logo, favicon/icon
- Theme color/branding controls
- Social media links & footer content management

SEO Control Center

- Meta title & meta description editor for every page
- Schema.org / structured data editor
- Focus keyword tool
- Auto-generated XML sitemap + editable robots.txt
- Custom editable URLs/permalinks
- Open Graph & social-sharing preview editor
- 301 redirect manager
- Broken link checker

Website & Content Management

- Unlimited dynamic page creation
- Drag-and-drop / block-based content editor
- Menu & navigation builder
- Testimonials & success-story manager
- Blog/article manager
- Media library for images, brochures and certificate templates

Batch & Course Management

- Course Master for levels, curriculum stages and age groups

- Batch creation with schedule, timezone, capacity, teacher(s) and fee
- Batch status: Upcoming / Ongoing / Completed / Closed
- Waitlist management
- Bulk batch actions and archiving

Teacher Management

- Teacher profiles with bio, qualifications and photo
- Assign/reassign teachers to batches
- Teacher performance & feedback tracking
- Teacher availability calendar

Student & Parent Management

- Search/filter student database by country, batch, level and status
- Parent-linked accounts for younger students
- Communication log per student
- Bulk email/SMS/WhatsApp notification tool

Fee & Payment Management

- Online payment tracking synced from gateway
- Offline/manual payment recording with proof upload
- Combined revenue dashboard
- Automated payment reminders
- GST-compliant auto-generated invoices & receipts
- Coupon/discount code system
- Batch/course renewal reminders
- Refund/adjustment handling
- Multi-currency: INR / USD / AED

Expense Management

- Expense categories
- Attach bills/proof to expenses
- Expense vs. Revenue comparison reports

Plugin / Feature Manager

- Install, activate, deactivate and configure feature plugins
- Automatic settings page for each plugin
- Future features can be added without touching the core system

Reports & Analytics

- Enrollment trends over time
- Country-wise student distribution
- Batch-wise & teacher-wise performance
- Website traffic & SEO performance overview

6. Teacher Panel — Features

- Personal dashboard with assigned batches and today's/upcoming classes
- Student roster per batch with contact details and enrollment status

- Add/update Zoom link for each class session
- Attendance marking
- Share notes, homework or learning material
- Schedule/calendar view
- Basic messaging/announcement tool
- View own performance/feedback ratings if enabled

7. Student / Parent Panel — Features

- Dashboard with all enrolled batches
- Upcoming class schedule with Zoom join link
- Attendance history
- Payment history, GST-compliant invoices/receipts and pending fee alerts
- Access shared learning material/homework
- Profile management including timezone preference
- Certificate/achievement display if enabled later
- Raise a support request/query

8. Public Website — SEO-Optimized Marketing Site

- Fully responsive across mobile, tablet and desktop
- SEO-optimized pages targeting India, US and UAE audiences
- Course/Batch listing with level, age group and schedule/timezone filters
- Registration & online payment flow
- Blog/resources section for SEO content marketing
- Testimonials and success stories
- Contact & inquiry forms

9. Student Journey — End-to-End Flow

01 **Discovery**	Visitor finds the site via SEO/search and browses available Abacus batches.
02 **Registration**	Student/parent creates an account with name, contact, country and timezone.
03 **Batch Selection**	Student browses batches filtered by level, age group, schedule/timezone and teacher.
04 **Payment**	Online gateway checkout with multi-currency and coupon/discount support, or offline payment recorded by Admin. GST-compliant invoice/receipt is generated either way.

05 **Enrollment Confirmation**	Automatic confirmation is sent via email/notification.
06 **Class Access**	Student receives the Zoom link for each session via dashboard/notification.
07 **Ongoing Access**	Dashboard keeps updating with attendance, payment status, upcoming sessions and shared material.

10. Role & Permission System

One of the most powerful parts of the platform is the configurable access-control layer.

- Super Admin sits at the top and defines the rules for everyone else.
- Custom Admin roles can be created with precise Add / Edit / Delete / View permissions and page/module visibility.
- Student/User access can also be controlled—for example, restricting pages to logged-in/enrolled users or hiding selected content from public visitors.
- As the team grows, new staff can receive exactly the access they need without developer involvement.

11. Future Scalability

The plugin-based module architecture allows future features—such as certificates, quizzes/assessments, attendance analytics, referral programs, loyalty/rewards, SMS/WhatsApp automation and multi-language support—to be developed as self-contained plugins and added without rebuilding the core platform.

12. Standard Plan vs. Advanced Plan

CAPABILITY	PACKAGE A • STANDARD	PACKAGE B • ADVANCED
LMS Core	Included	Included
Zoom-based class delivery	Included	Included
Website pages	Fixed set	Unlimited & dynamic
SEO control	Basic setup	Full dynamic SEO panel
Roles & permissions	4 fixed roles	Configurable Super Admin + custom roles
Adding new features	Fresh development required	Plugin-based
Payments	Online + Offline	Online + Offline + multi-currency + GST invoicing + coupons + renewal reminders
Reporting	Basic	Advanced dashboards
Long-term cost of change	Higher / developer-dependent	Lower / more self-serviced

13. What Makes This Platform Different

- WordPress-like ease of managing content and settings, purpose-built for an Abacus coaching business.
- True Super Admin → Admin → Teacher → Student hierarchy with granular, configurable permissions.
- SEO-first foundation for discoverability among NRI parents in the US/UAE.
- Clear separation of website marketing/SEO, LMS operations and finance—working together as one platform.
- Manual/individual Zoom-based class delivery while the platform handles business logistics.
- Built to scale through plugins and configurable staff roles without re-engineering the core.

ADVANCED PLAN — BUILT FOR SCALE

The Advanced Plan is designed for businesses that want serious growth into the US/UAE NRI market, with independent control over content, SEO, staff access and future features.

Prepared for Client Review • Package B — Advanced Plan

Detailed technical specifications are maintained separately for the development team.
